Road Haulage and Logistics Industries

Document Emailer

Document Emailer Application

Have you ever calculated how much your company could possibly save by not having to post out Invoices, Statements, Remittances, or any other business document?

Stirling Solutions Document Emailer can facilitate the emailing of any documents created from within our comprehensive suite of software solutions.

Enhanced to incorporate your company branding and messages, all required documents are emailed as PDF files, facilitating a professional display for all required business documents.

Available as either a single user license, or within a multi user environment, Document Emailer enables the user the opportunity to quickly and easily email all business documents at the touch of a button. Subsequently, any documents can be emailed from our Traffic Desk, Warehouse, Workshop or Accounts Modules, directly to your chosen recipient.

Stirling Solutions Document Emailer offers the benefits of:

- Reduce postage, stationery and office administrative costs, through emailing documentation at the touch of a button from within our suite of software solutions.
- Save administrative time otherwise spent printing documents, and posting out to the recipient, through emailing directly from your computer.
- Avoids the cost of purchasing pre-printed stationery, as all required document layouts can be created from within our suite of software solutions.
- Offers you an opportunity to incorporate your company's logo / branding to all system generated documentation, facilitating a professional look.
- Assists in streamlining business processes, through offering a timely, efficient and cost effective approach to improving your service to your customers / suppliers.
- Eliminate the risk of human error in otherwise posting out important documents to the wrong person, as all documentation can be emailed directly to the recipient.
- Enables documents to be emailed out to multiple recipients.
- Document Emailer reduces waste by eliminating the need for printed documents, facilitating a greener solution for the environment.
