eTransport+ Module

Stirling Solutions eTransport+ module is a web based facility offering your customers the opportunity to both remotely input and manage their job requests over an eTransport+ site hosted by you.

eTransport+ is actively linked to your Traffic Desk module, enabling a comprehensive real time update facility. Subsequently, all updates to Traffic Desk are automatically updated to eTransport+, offering your customer the possibility of tracking and tracing the exact progress of all of their jobs on a real time basis.

Stirling Solutions eTransport+ Module offers you the benefits of:

Customising your eTransport+ Site

- The site can be customised to incorporate both your brand / company name and logo.
- You can securely control which customers have access to your eTransport+ site for the purpose of both inputting and identifying their own jobs, by individual password protection.
- Hosted centrally by yourselves, you are fully in control, enabling you the opportunity of not only identifying which customers are active on your eTransport+ site, but also offering you the facility to fully manage and control your own Internet Application.

Optimise your productivity

- Once your customer has input a job request on to your eTransport+ site, you instantly have the option to decide whether to accept or reject their request. Accepted jobs can be seamlessly imported directly into Traffic Desk. Subsequently offering you not only the benefits of direct customer input but also significantly eliminating data input errors.
- Reducing both staff and telephone costs by alleviating the need to constantly contact your customers with job confirmations and regular updates. Furthermore, reduce paperwork by alleviating the need for fax orders and written job sheets.
- Using the track and trace facility, your customers will benefit from the ability to monitor the continuing progress, and status, of any of their jobs on a real time basis.
- Through eTransport+ your customers can identify and select their own required POD's on line, the instant they are available.
