Traffic Desk Module

Stirling Solutions Windows based Traffic Desk module can be operated on either a stand-alone basis or integrated solution to suit your requirements. It enables the user to dynamically manage and optimise the delivery of goods, services and information. Facilitating greater and immediate control for supervisors and management, helping your company become a more profitable environment.

Whilst extremely powerful, Stirling Solutions have managed to maintain a high degree of flexibility through data entry, making traffic desk easy to implement and able to fit in with the way you choose to work.

Stirling Solutions Traffic Desk Module offers you the benefits of:

- Configurable Traffic Diary User Screen Layout.
- Full integration with our Warehouse, Workshop, Accounts, Scanning, eTransport, eTransport+ and eDriver Modules.
- Links to various Pallet Network Hub Software.
- Comprehensive EDI and Third Party Application Integration.
- Integrated links to third party mapping software for both mileage calculation and map display, for both single and multi loads.
- Traffic Desk 'Text Messaging' Facility.
- Comprehensive Transport Report Generator and Tailored Reporting Features through Crystal Reports.
- Powerful Search and Filter Facility.
- Quick Entry Input Screen.
- Automatic Job Rating Facility.
- Complete Multi Depot Facility.
- Load Build and On Screen Planning Facility.
- Integrated Product Facility for companies who not only provide a haulage and distribution service but also offer either their own or third party products.
- Hazardous Transport Facility.
- Driver, Vehicle, Trailer and Sub Contractor maintenance files.
- Links to Third Party Accounts packages.
