Warehouse Management Modules

The definitive third party warehouse management system, providing the solution to meet and exceed customer expectations.

Stirling Solutions together with our active business partners offer a comprehensive Windows based Warehouse module catering for both single warehouse or multi site organisations. Coupled with the benefits of being integrated to our Traffic Desk software, this offers a comprehensive solution for all aspects of warehouse management. These Warehousing solutions offer you the accuracy to enhance your operational capabilities, improving existing workflows and processes.

Warehouse Management Solutions offers you the benefits of:

- An integrated link to Traffic desk, subsequently generating a job within transport direct from your warehouse module.
- Automated warehouse invoicing, linked to either our accounts module or if preferred a third party accounting package.
- Controlling your Warehouse Management functions in real time, offering complete visibility of all stock through sophisticated track and trace features. Warehouse provides unmatched functionality and control, providing maximum efficiency and accuracy.
- Maintaining a comprehensive record of all your stock and customer details couldn't be easier. Either assessing customer history, stock levels or minimum reorder levels, all the required management information to meet the requirements of a warehousing operation is available on a real time basis.
- Bar code scanning can enhance your real time system by utilising hand held scanners. Whether you are recording goods received into, or booked out of the warehouse, or moving stock from one location to another, hand held scanners instantly update your records.
- Maximising inventory visibility in the warehouse by accurately tracking expected and received deliveries. Coupled with the full traceability of the order fulfilment process. The system helps you to reduce overall lead times.
- Comprehensive reporting features, through utilising Crystal Reports, detailing movements, balances and locations can be available as and when required.
- Incorporate RF Bar coding and processes, coupled with EDI integration and your clients web access facility, and you are offering your customers an integrated service, considered second to none.
